**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating a subject having a tumor with the instantly claimed compounds, does not reasonably provide enablement for preventing a tumor in said subject. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to preventing a tumor in a patient the invention commensurate in scope with these claims. Applicants have reasonably demonstrated/disclosed that the claimed compound is useful as a therapeutic agent for treating cancer and/or reducing the risk thereof. However, the claim also encompasses using the claimed compound to prevent a tumor, which is clearly beyond the scope of the instantly disclosed/claimed invention. Please note that the term "prevent" is an absolute definition which means to stop from occurring, and thus, requires a higher standard for enablement than does "treating", especially with respect to preventing a tumor from forming (which, is not recognized in the medical art as being a totally preventable condition).

Accordingly, it would undue experimentation without a reasonable expectation of success for one of skill in the art to use the claimed compound as claimed with respect to preventing a tumor. It is suggested that claim 5 be amended so as to omit the term

Art Unit: 1654

“preventing” and instead recite --treating and/or reducing the risk thereof-- to overcome this rejection.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term ‘administering is indefinite because it does not disclose to whom, or what the instantly disclosed compounds are to be given – e.g., is the compound being administered to a subject in need thereof, to a bottle, or something else? It is suggested that the phrase --to a subject in need thereof-- be appropriately inserted into claim 5 to overcome this rejection.

#### Conclusion

Claims 1 to 4, and 6 to 11 are allowed because the prior art do not teach nor reasonably suggest the instantly claimed anti-tumor compound
